

◆ OUR IDENTITY

About PakAssist

A dedicated civic-technology movement aiming to lower administrative boundaries and empower every Pakistani citizen with structured information.

◆ THE MISSION

Bridging the gap between citizens and civic duties.

PakAssist was born out of a simple realization: navigating government paperwork should not require hiring expensive third-party agents or standing in long queues just to ask basic questions.

Our mission is to make governmental procedures accessible, structured, and easy to execute. By combining language model technology with verified official manuals, we deliver instant procedural blueprints in the languages our citizens speak.

Our Civic Impact Targets

- 🛡️ Protecting citizens from fraudulent brokers.
- 🌐 Democratic access in English & Urdu.
- 🕒 Reducing hours lost in administrative lookup.

BUREAUCRATIC REALITY

The Administrative Hurdles We Target

Scattered Guidelines

Official guidelines are often buried across disparate PDF files, outdated provincial circulars, and unmaintained static federal portals.

Unclear Costs & Challans

Hidden processing surcharges, complex bank voucher submission requirements, and local office service taxes create confusion on true costs.

Exploitative Agents

Unauthorised middlemen prey on citizens by charging exorbitant fees for basic booking processes or simple online application filing.

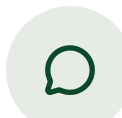

THE SOLUTION

Our Core Principles

Accurate Information

Guidelines are cross-referenced daily with direct government circulars and official publications.

Plain Language

No legal jargon or technical policy terminology. Answers are parsed to read like standard, everyday conversation.

Step-by-Step Guidance

Chronological lists of what to print, where to sign, how much to pay, and which queue to join first.

PORTAL FOOTPRINT

Government Bodies Covered

NADRA Identity Cards

Directorate General of Passports

Federal Board of Revenue (FBR)

Excise & Taxation Department

Traffic Police Licensing Authorities

Provincial Union Councils

Board of Intermediate & Secondary Education (BISE)

CIVIC ROADMAP

Upcoming Civic Features

PHASE 1

Advanced Urdu Engine

Upgrading Urdu translations to naturally match provincial dialects and script styles for easier offline reading.

PHASE 2

WhatsApp Voice Assistant

Allowing users to send voice notes in Urdu on WhatsApp and receive instant voice procedural guides back.

PHASE 3

Interactive Booking Integration

Direct contextual deep-linking to corresponding department registration pages, bypassing central navigation menus.

Built by Citizens, For Citizens

PakAssist is an independent open-source civic tech project constructed by passionate developers, product designers, and public policy volunteers aiming to expand digital literacy and accessibility in Pakistan.
